DETAILED ACTION

Claims 1 - 9 have been examined.

Claim Objections

Claims 6 and 7 objected to because of the following informalities: claim 6 includes the word "wedgedshaped" where all other similar references use the word "wedge-shaped". Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Miyajima (5,116,699). Miyajima discloses a battery box comprising:

- a device for fixing a housing to a carrier plate (Fig. 1, item 6);
- a spring loaded curved fixing part (Fig. 1, item 8);
- a retaining edge (Fig. 1, item 4);
- said spring loaded curved fixing part being held between a wall of said housing and said retaining edge (column 3, lines 25 - 32);
- said spring loaded curved fixing part being formed in a u-shape from a springy material (column 3, lines 21 and 22);

Art Unit: 3618

- a first leg of said u-shape being held against said retaining edge (Fig. 1, item 7);
- a second leg of said u-shape being held against said housing wall (Fig. 1, item 8).

Allowable Subject Matter

Claims 3 - 9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: the prior art of record, either alone or in combination, neither disclose nor suggest a wedge-shaped, beveled end of a first leg of a u-shaped fixing part, said beveled end fitting against a beveled side of said housing wall.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

- Furtney (1,881,461) discloses a battery carrier terminal assembly;
- Wild et al. (4,793,601) disclose a key spring;
- Osaki et al. (5,771,149) disclose a capacitor device;

Art Unit: 3618

- Brouns et al. (6,224,998) disclose a battery, tray and heat shield assembly;
- Lavanture (6,521,371) discloses a battery tray;
- Schneider et al. (6,880,657) disclose an adjustable reinforced structural assembly;
- Boville (7,389,841) discloses a device for fixing a housing to a carrier plate.
